Subject: RE: Solvay - FollowUp 114 Request

Hi Kelly,

In response to the second part of your question, after further discussion today, Joe and I were able to narrow down, somewhat, the information we need on the projects.

The most urgent information for the projects and Star Link 2, in particular, would be that for the items requested in question 6(a)-(f) in the 2014 RFI Letter and referenced in question 1 of the 2016 RFI Letter. In other words, the responsive items to question 6(g)-(h), are not as crucial at this time. Thus, if purchase orders and/or price quotations are taking up a lot of that documentation you mentioned for Star Link 2, this may be helpful to reduce the number of responsive documents at this time.

The remaining questions, still stand as necessary for a complete response. We can discuss on Monday whether it would be preferable for Solvay to submit a partial response on March 2 or if an extension overall would be more appropriate.

Please let me know if you need further clarification on this when we speak on Monday.

Have a great weekend,

Lauren Hammond

That sounds good. I'm generally available most of the day on Monday.

I hope you both have a good weekend.

Hi Kelly, no problem. Let's try to talk Monday. My travel schedule is changing, but once I know where I'll be when for a bit, I'll shoot you an email and see if we can connect.

If it works, I'll tie our attorney, Lauren Hammond, in on the call, just to see if we can deal with any and all questions at once.

Thanks,
Joe

Thanks Joe. And, I apologize for not reaching out sooner. I wanted to get a sense from my client where we stood on responding before we chatted.

As I calculate it, the response is due Wednesday, March 2.

1. We will only be able to partially respond at that time so I wanted to discuss if you want a partial response or if I should just request an extension for our entire response. In my experience, EPA staff vary on whether they like partial or full responses. What would you prefer? Let me know and I'll send a formal email request.

2. With respect to the requests where we will not be able to meet the March 2 deadline, I have a few clarifying questions to help ensure that we are on the same page with respect to the projects and the documents you need. For example, the Star Strike 2 project was a major undertaking for Solvay and the non-EHS supporting documents, including the engineering, are housed in notebooks and files which take the entirety of four full bookshelves. I suspect much of what is there you don't want but I want to make sure that the direction I give them for review and production is consistent with what you do need. There are a few other requests where Solvay has questions and I thought it would make sense for us to walk through them.

Again, sorry for bothering you on what, I hope, is vacation.

Kelly

Hi Kelly, I'm out of town end of this week and all of next. The schedule next week is a bit up in the air, so I may have a chance to call you, but it will likely be on short notice.

Perhaps Tues Mar 1 at 1pm eastern, if we don't get to talk before then?

Thanks,
Joe

Subject: Solvay - FollowUp 114 Request

Joe – Is there a good time over the next few days for us to talk about the follow-up Section 114 Request to Solvay?
Thanks. Kelly
